Draw / check ...

By using this measuring sheet you can check if your child's Angulus shoes have the right size or which size you will need to buy next.

Place your child's foot/heel where indicated below. Draw an outline of the foot (the child needs to stand up).

Add 1-1 1/2 cm to the length of the foot (for growth). The correct shoe size can be read from the size guide.

Remember!

It is important to try the shoes on.

Name: :-----

Date:-----

Measured size: -----
